📞 97172 44489 ✉️ [vishnuprasadforwork@gmail.com](mailto:vishnuprasadforwork@gmail.com) 🔗 [linkedin.com/in/vishnu-prasad-korada](https://www.linkedin.com/in/vishnu-prasad-korada) 🐙 [github.com/vishnuprasad2004](https://github.com/vishnuprasad2004) 📁 Portfolio

## SKILLS

**Languages** Java, TypeScript, JavaScript, Python, SQL  
**Frameworks** Spring Boot, Spring AI, Langchain Spring Security, Node.js, Express.js, React.js  
**Tools & DBs** Docker, Kubernetes, PostgreSQL, MongoDB, GitHub Actions, Redis, AWS (S3, EC2), Postman  
**Specializations** RESTful APIs, Microservices, System Design, OOP, Design Patterns

## EXPERIENCE

### MindX360 Technologies

Jan, 2026 – Mar, 2026

Trainee Consultant Intern

- Developed fault-tolerant backend services using **Java 21** and **Spring Boot**, implementing Resilience4j circuit breakers to achieve **99.9%** service availability during external dependency failures.
- Architected secure, scalable APIs by integrating **OAuth2** and **RBAC**, reducing unauthorized access risks while managing data persistence via Hibernate JPA with optimistic locking for high-concurrency reliability.
- Streamlined data integration by engineering a production-grade **XLSX-to-JSON transformation pipeline**, accelerating downstream system consumption through automated parsing and multi-tier caching.

### KPMG India

May, 2025 – June, 2025

Summer Intern

- Implemented **CI/CD pipelines** in Azure DevOps, managing version control via Azure Repos to automate release cycles and reduce manual deployment overhead.

## PROJECTS

### Paper Trading Tournament Platform

[Project Link](#)

Java 21 · Spring Boot 3.5 · Spring AI · Spring Security · PostgreSQL · Caffeine · Resilience4j

- Engineered a **context-aware AI trading assistant** using **Spring AI** and LLM integration, grounding every inference call with live portfolio state, holdings P&L, and tournament context — eliminating hallucinated advice and delivering actionable coaching for user.
- Designed a **resilient market data layer** with Resilience4j circuit breaker, 4-tier Caffeine cache, and scheduled pre-warming — maintaining sub-200ms price fetch under degraded conditions — secured by dual auth (JWT refresh token rotation with reuse detection + **OAuth2**).
- Prevented concurrent trade corruption via **optimistic locking** on Portfolio and Holding entities (409 on collision) and idempotency keys on buy/sell

### E-Commerce Platform with Microservices

[Project Link](#)

Distributed Systems · Backend API Development

- Architected a **microservices-based E-Commerce REST API** with independently deployable services using **Docker** and **Kubernetes**, enabling isolated scaling and fault containment.
- Applied deliberate database selection: **MongoDB for read-heavy catalog services** and **PostgreSQL for ACID-compliant transactions** — demonstrating trade-off reasoning across persistence layers.
- Reduced API latency by **90.4%** using **Redis caching** and integrated **AWS S3** for decoupled product image storage with pagination on all list endpoints.

## ACHIEVEMENTS / CERTIFICATIONS

### Technical Lead, Webeye Club GIETU

July 2024 – Dec 2025

- Led 3+ workshops for **300+ students**, driving technical growth in web development and agile practices.

### Winner, EduTech Track at Hacknovation

- Led a 2-member team to deliver an innovative EdTech solution under tight deadlines.

### Technical Certifications

- **AI/ML**: Oracle OCI 2025 AI Foundations Associate; Supervised ML by DeepLearning.AI.
- **Programming**: 5 Stars in Java, Python, and JS on HackerRank; Postman API Student Expert.

## EDUCATION

### GIET University

2022 – 2026

B.Tech in Computer Science Engineering with Specialization in AIML

CGPA: 8.6/10

**Coursework**: Data Structures & Algorithms, OOP, OS, Computer Networks, DBMS, Design Patterns
