Vishnu Prasad Korada

97172 44489 | vishnuprasadkorada@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Early-career Software Engineer with hands-on experience in Java, Spring Boot, React.js and backend development. Interested in building reliable software systems, integrating AI capabilities and solving engineering problems through strong fundamentals in OOP, databases and software design.

Technical Skills

Languages Java, JavaScript, TypeScript, Python, SQL, HTML/CSS
Frameworks Spring Boot, Spring Security, React.js, Node.js, Express.js
Databases PostgreSQL, MongoDB, Redis
AI Spring AI, Generative AI, RAG, Gemini API
Tools Git, Azure DevOps, Docker, Kubernetes, Postman
Concepts OOP, DSA, REST APIs, Design Patterns, Microservices, SDLC, Caching

Experience

mindX360 Technologies **Hyderabad**
Associate Consultant – Software Engineering *Jun 2026 – Present*

- Developed and maintained React.js interfaces for client-facing applications, implementing features and debugging functional and UI issues.
- Implemented Redux for selected application workflows to improve client-side state management and responsiveness.
- Developed MERN-stack POCs using Node.js, Express.js, MongoDB and REST APIs to validate application functionality.

Trainee Consultant *Jan 2026 – Mar 2026*

- Developed backend services using Java 21 and Spring Boot, implementing Resilience4j for fault tolerance in external service integrations.
- Built secure REST APIs using Spring Security and JPA, applying optimistic locking and caching for concurrent workflows.

KPMG India **Hyderabad**
Summer Intern *Jun 2025*

- Implemented CI/CD pipelines using Azure DevOps and managed source control through Azure Repos.
- Built an HR onboarding automation solution using Power Platform, Dynamics 365 and Copilot Studio.

Projects

Argus – Terminal-Native Observability Workspace **GitHub**
Go, Docker, Gemini AI, Bubble Tea

- Built a Go-based observability TUI that collects and streams logs from Docker containers, local processes and log files, alongside live Docker resource metrics.
- Implemented an AI orchestration workflow with specialist log-analysis and root-cause analysis tools, token streaming and best-effort secret/PII redaction.

Paper Trading Tournament Platform **GitHub**
Java 21, Spring Boot, Spring AI, PostgreSQL, Spring Security

- Developed a context-aware AI trading assistant using Spring AI, grounding responses with portfolio state and P&L data.
- Designed REST APIs with JWT/OAuth2 authentication, Resilience4j, caching, optimistic locking and idempotency.

E-Commerce Platform with Microservices **GitHub**
Node.js, TypeScript, MongoDB, PostgreSQL, Redis, Docker

- Built independently deployable microservices and REST APIs, using MongoDB for catalog workloads and PostgreSQL for transactional data.
- Reduced API response latency by approximately 90% through Redis caching and optimized data-access patterns.

Achievements & Certifications

- **Technical Lead, Webeye Club, GIETU:** Led 3+ technical workshops covering web development for 300+ students.
- **Winner, EduTech Track – Hacknovation:** Led a two-member team to develop and present an EdTech solution.
- **Certifications:** Oracle OCI AI Foundations Associate; Supervised Machine Learning – DeepLearning.AI.
- **Programming:** 5-Star HackerRank in Java, Python and JavaScript; 250+ DSA problems solved.

Education

GIET University **2022 – 2026**
B.Tech, Computer Science Engineering (AIML) CGPA: 8.6/10
